SPECIFIC ENVIRONMENTAL CONCERNS AND AVOIDANCE/MITIGATION MEASURES

Environmental Concerns:	Avoidance/Mitigation Measures:
Tracking of All Waste Materials	<ul style="list-style-type: none"> - Utilize the Spill Material Tracking Event Log to record all material recovered from this event (liquid, solids, booms, socks pads,) - Return these logs to the Planning Section – Technical Lead at the end of every shift.
Solid waste management (i.e. booms, dry soil, etc)	<ul style="list-style-type: none"> - Continue staging hazardous waste roll off boxes - Use hazardous waste roll-off boxes for material without free liquids - Heritage to manage labelling, manifesting and shipping. No oil containing material is to be shipped until approved by Planning Section – Technical and the EUL. - Use the appropriate box labelled for the material (i.e. 6 Separator box vs Shore box). - Heritage/Laborer supervisors to direct cleanup workers to segregate materials that contain oil versus those that do not obviously contain oil
Liquid oil soaked material (Limited scope)	<ul style="list-style-type: none"> - Contact Heritage when drums are full for labelling/manifesting/transport. Heritage may allow drums to be dumped into roll-off boxes if free liquids are not observed in drums - Continue using vacuum trucks for managing liquids from 6 separator and recovered material from lake
Liquid Material	<ul style="list-style-type: none"> - Discharge liquid material from vacuum trucks in: - Lakefront Bar Screen (preferred option) - Alky Casper Sump (secondary option)
Beach Cleanup - accumulated oil	<ul style="list-style-type: none"> - Keep 55 gallon drums staged in area remote from beach to prevent additional spills - Use hand tools to clean up accumulated oil from beach - Deposit accumulated oil in trash bags, deposit trash bags in 55-gallon haz waste drums
Decontamination of personnel	<ul style="list-style-type: none"> - Use 55 gallon haz waste drums at decontamination stations to contain used PPE. - Allow Heritage to inspect 55 gallon drums containing waste PPE to evaluate for free liquid – if drums do not contain free liquid then contents of drum may be combined with material in haz waste roll off box
Equipment decontamination	<ul style="list-style-type: none"> - Equipment which can be moved via trailer may

- be moved to the cleaning pad for washing/decontamination
